Subject Index of Volume 30

Absorption
of carbon dioxide into aqueous solutions of monoethanolamine, Marangoni instability during, 113

Balance adjustment
in large chemical process systems, optimization method for, 45
Bubble cluster shapes
in two-phase flow, new method in investigations of, 107

Catalytic conversion
methane steam, mathematical simulation of performance of single tube of commercial reactor for: comparison of one- and two-dimensional pseudo-homogeneous models, 3
Catalytic hydrogenation
of *o*-cresol on Ni/SiO_2, kinetics and slurry-type reactor modelling during, 133
Cluster shapes
of bubbles in two-phase flow, new method in investigations of, 107
Compressible gas–liquid flow
through pipeline restrictions, 39
Condensation
of water and mineral oil during cooling of paper web on cooling roller, simulation of, 151
Contact drying modelling
of agitated porous alumina beads, 31
Cooling
of paper web on cooling roller, simulation of water and mineral oil condensation during, 151

Dehumidifiers
packed bed liquid desiccant, analysis of thermal effects in, 79
Drag coefficient
and wall effects: experimental study of free fall of cones in Newtonian and non-Newtonian media, 61
Drying
contact, of agitated porous alumina beads, modelling of, 31
Drying rate curves
for nonhygroscopic porous slabs, estimation of, using characteristic function for regular regime, 87

Ethyl *tert*-butyl ether
kinetics and mechanism of liquid-phase synthesis of, 141

Fluidized bed driers
contribution to scale-up of, and conversion from batchwise to continuous operation, 51
Free fall
of cones in Newtonian and non-Newtonian media, experimental study of: drag coefficient and wall effects, 61

Gas–liquid flow
compressible, through pipeline restrictions, 39
Granular materials
trickling, heat transfer to, 157

Heat transfer
to trickling granular materials, 157
Hydrogenation
catalytic, of *o*-cresol on Ni/SiO_2, kinetics and slurry-type reactor modelling during, 133

Isomerization
of maleic acid to fumaric acid using ammonium bromide as soluble catalyst, techno-economic optimization of, 15

Kinetics
and slurry-type reactor modelling during catalytic hydrogenation of *o*-cresol on Ni/SiO_2, 133
of sulphation of limestone and precalcined limestone, 97

Marangoni instability
during absorption of carbon dioxide into aqueous solutions of monoethanolamine, 113
Mass transfer
in supercritical fluid extraction of binary aromatic mixture, naphthalene and phenanthrene, from porous rods, 69
Micromixing
and fast chemical reactions in static mixers, 23
Mixers
static, micromixing and fast chemical reactions in, 23

Newtonian and power law liquids
rolling ball viscometry for, 11

Optimization
techno-economic, of isomerization of maleic acid to fumaric acid using ammonium bromide soluble catalyst, 15
Optimization method
for balance adjustment in large chemical process systems, 45

Packed bed liquid desiccant dehumidifiers
analysis of thermal effects in, 79
Paper web
cooling roller, simulation of water and mineral oil condensation during cooling of, 151
Pipeline restrictions
compressible gas–liquid flow through, 39
Porous rods
mass transfer in supercritical fluid extraction of binary aromatic mixture, naphthalene and phenanthrene, from, 69
Porous slabs
nonhygroscopic, estimation of drying rate curves for, using characteristic function for regular regime, 87

Reactions
fast chemical, and micromixing in static mixers, 23

Scale-up
of fluidized bed driers, contribution to, and conversion from batchwise to continuous operation, 51
Slurry-type reactor modelling
and kinetics during catalytic hydrogenation of *o*-cresol on Ni/SiO_2, 133
Sulphation
of limestone and precalcined limestone, kinetics of, 97
Supercritical fluid extraction
of binary aromatic mixture, naphthalene and phenanthrene, from porous rods, mass transfer in, 69

Thermal effects
in packed bed liquid desiccant dehumidifiers, analysis of, 79
Transport phenomena
over partially active surfaces, 125
Trickling granular materials
heat transfer to, 157

Viscometry
rolling ball, for Newtonian and power law liquids, 11

Wall effects
and drag coefficient: experimental study of free fall of cones in Newtonian and non-Newtonian media, 61
